

Analysing and evaluating costumes, hair and make-up

Is hair worn up or down? Is it long or short? Does it change at any point? What does it suggest about the character?

Is the make-up distinctive in any way? Is it used to show age? To show character or style? Is it natural or exaggerated/fantastical?

What is the **silhouette** of the costume? Is anything distinctive about the length or fit of the costume? What colours and fabrics are used?

Are there any notable accessories such as hats, shawls, canes or handbags?

What footwear is worn? Does this suggest an occupation, period or character trait?
